FIT GUARD Feature Guide

Complete Platform Documentation

1. GPS Tracking

Overview

Real-time location tracking for all security personnel with comprehensive route history and geofencing capabilities.

Features

- **Live Tracking:** View guard locations in real-time on an interactive map
- **Route History:** Access complete movement history with timestamps
- **Geofencing:** Set virtual boundaries and receive alerts when guards enter/exit zones
- **Battery Optimization:** Intelligent tracking intervals to preserve device battery

How It Works

1. Guard opens FIT GUARD mobile app
2. Location tracking activates automatically during shift
3. Supervisors monitor positions via web dashboard
4. Alerts trigger for boundary violations or unusual patterns

2. Digital Reporting

Overview

Replace paper reports with digital forms that include photos, videos, and automatic timestamps.

Report Types

- **Daily Activity Reports (DAR)**
- **Incident Reports**
- **Maintenance Reports**
- **Visitor Logs**
- **Vehicle Inspection Reports**
- **Custom Reports**

Features

- Customizable templates
- Mandatory field validation
- Photo/video attachments
- GPS location stamps
- Digital signatures
- Automatic client delivery

3. Time Clock

Overview

GPS-verified time tracking with comprehensive attendance management.

Features

- **Clock In/Out:** GPS-verified with photo capture
- **Break Tracking:** Automatic break time calculation
- **Overtime Alerts:** Notifications for approaching overtime
- **Schedule Comparison:** Actual vs. scheduled hours
- **Export Options:** CSV, PDF for payroll integration

---

4. NFC Patrol Verification

Overview

Ensure patrol compliance with NFC checkpoint scanning.

Setup

1. Install NFC tags at checkpoint locations
2. Configure patrol routes in dashboard
3. Set expected scan intervals
4. Guards scan tags during patrol

Alerts

- Missed checkpoint notifications
- Late scan warnings
- Route deviation alerts
- Completion confirmations

5. Secure Messenger

Overview

Built-in communication platform for team coordination.

Features

- End-to-end encryption
- One-on-one messaging
- Group channels
- File sharing (images, documents)
- Voice messages
- Read receipts
- Message search

6. Panic Alert

Overview

Emergency response system for guard safety.

Activation

- One-touch panic button in app
- Hardware button support (optional)
- Voice activation (configurable)

Response

- Instant GPS location shared
- All supervisors notified

- Audio recording begins

- Nearest guards alerted

- Emergency contacts notified

User Roles

Administrator

- Full system access

- User management

- Client management

- Billing and reports

- System configuration

Supervisor

- Team management

- Real-time monitoring

- Report review

- Schedule management

- Alert handling

Guard

- Mobile app access

- Report submission

- Time clock

- Patrol scanning

- Messaging

Client

- Dashboard access
- Report viewing
- Guard tracking (optional)
- Communication channel
